**SAMPLE ONLY**

The ultimate objective of my professional career is to layout a roadmap of a non-profit organisation's goal achievements from a management and marketing point of view. I want to help NPOs to achieve a suitable balance between the competing goals of maintaining solvency (with sufficient funds for activities) and social efficacy. I strongly believe that working for a management consulting agency specialising in non-governmental organisations will allow me to attain my goal.

### Career Objectives

Clearly state what you wish to achieve by studying this course.

### Previous Studies

Your education history and how it relates to what course you are applying for.

At undergraduate school, I read sociology to study more about human nature, organisation and drives. For my graduation thesis, I researched non-profit organisations, particularly in China in terms of structural and legal problems, the traditional inwardness of the Japanese, and the future of non-profit organisations.

While I was at high school and university, I was very involved in activities ranging from local to global. From the first year to the third year, I worked for a variety of non-profit organisations as a counsellor at City Hall.

After graduating, I chose to work for a consulting company to gain consulting skills. I gained great experience in analytical skills such as marketing research, analysis, data analysis, contention analysis, and personnel evaluation.

### Work Experience

What voluntary or paid work you have undertaken which gives you experience in this specific area of study.

### Why you wish to study in the UK

I was involved with many practical activities related to establishing new organisations, helped to plan charity events, and spoke on a lecture circuit about many themes of non-profit sectors. Besides these local activities, I also participated in many worldwide conferences such as the 1st International Youth Conference in Kenya, held by the World Youth Alliance during my stay in London. During the past ten years I have been engaged in many NPO activities, encountered more than 200 organisations all around the world, and gradually become intrigued in not only the practical activities but also the management aspects of organisations. The question: what is the best way for these organisations to be managed from the viewpoint of commitment to their mission and how to balance profitability and sociality?

The reason why I wish to study abroad in the UK is because it is the place where English originated. I feel that being exposed to a new culture, with its varied ideas and outlook, will help me to understand all of the things that I have learned about with a new awareness and a new perspective.

To achieve my objective, it is imperative for me to gain a sophisticated and wide knowledge of all aspects of business and particularly management. Thus, the postgraduate Business and Management programme at your university is the best course for me because this course will not only allow me to obtain essential skills like specialised management and marketing research but also help to hone my logical abilities and inspire me to visionary ideas for the coming future.

### Academic Objectives

How this course will benefit your future career.

## ARE THEY IMPORTANT?

Your reference letter gives you credibility, convincing admissions officers of your past success and future prospects.

## Employer Reference Letter

Please read below for an example of a business reference letter of a student applying for an MBA.

## THINGS TO REMEMBER:

- Choose an appropriate referee
- Print on official company or university letterhead/envelope
- Explain your relationship with the referee
- Express confidence that you will complete the course
- Don't forget the signature of the referee

## Academic Reference Letter

Please read below for an example of an academic reference letter of a student applying for a degree in Social Psychology.

To Whom It May Concern:

**It is my pleasure to recommend Ms. Smith for admission to your program. I instructed Ms. Smith in her junior and senior years in my regular Social Psychology class held once a week and in my Social Psychology seminar.** Also, I gave her guidance on her graduate thesis as the instructor in charge. Through her dedication to her studies, and the eagerness with which she approached her research projects, **Ms. Smith has proven herself to be a truly mature and responsible individual.**

As a professor of Humanities and Social Science, specializing in Social Psychology, at your University, I have come across many students with an outstanding knowledge and understanding of Social Psychology and related areas.
